

SUPRIYA MANIGANDLA

PYTHON FULL STACK AI DEVELOPER

CONTACT

- +91 8008232140
- rupasupriya27183@gmail.com
- Machilipatnam, Andhra Pradesh, India
- linkedin.com/in/manigandla-supriya
- github.com/Manigandlasupriya

TECHNICAL SKILLS

Languages

- Python
- JavaScript
- SQL
- Java

AI / ML & Data

- Gemini AI
- OpenAI API
- CNN
- Keras
- OpenCV
- NumPy
- Pandas
- scikit-learn

Frameworks & Backend

- FastAPI
- Flask
- Django
- RESTful APIs

Frontend

- React.js
- HTML5
- CSS3
- Tailwind

Databases

- MySQL
- Firebase

Cloud & DevOps

- AWS EC2
- S3
- Lambda
- RDS
- Docker
- Git

Tools & Practices

- Postman
- EmailJS
- Agile/SDLC

CERTIFICATIONS

- Cloud Computing A+ — Honeywell, 2023
- SQL Certification — HackerRank, 2024
- Python Essentials I — Cisco, 2023
- Academic Topper — B.Tech, 2020–2024
- National Finalist — Kavach Hackathon & Flipkart GRID 5.0

SOFT SKILLS

- Communication
- Problem Solving
- Teamwork & Collaboration
- Adaptability
- Time Management
- Analytical Thinking
- Attention to Detail
- Ownership & Accountability

INTERESTS

- Gardening
- Photography
- Travelling
- Learning

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate specializing as a Python Full Stack AI Developer, with hands-on experience building and supporting production-grade Python applications and AI-powered features across the full software development lifecycle. Skilled in designing scalable services with FastAPI and Flask, integrating AI/ML capabilities (Gemini AI, OpenAI API, CNNs), diagnosing and resolving complex application issues through structured root-cause analysis, and optimizing performance to sustain high service availability. Well-versed in REST API design, relational database management, and AWS cloud deployment, with a track record of working effectively in Agile teams to deliver dependable, user-focused, AI-driven solutions.

PROFESSIONAL EXPERIENCE

Python Full Stack Intern

Apr 2025 – Mar 2026

Motive Computer Education — Guntur, India

- Developed and maintained full-stack Python applications using FastAPI, React.js, and MySQL, with a consistent focus on reliability, performance, and maintainability.
- Designed and implemented secure RESTful APIs that enabled seamless communication between frontend and backend services.
- Investigated and resolved user-reported application issues through systematic debugging, troubleshooting, and root cause analysis, reducing recurring defects.
- Optimized backend workflows, database queries, and API response times to improve scalability and overall user experience.
- Contributed across the full SDLC — testing, deployment, and monitoring — within an Agile environment, driving continuous improvement.

Software Development Intern (Remote)

Jul 2024 – Mar 2025

KodNest Technologies — Remote

- Built and supported full-stack web applications using Python (Flask) and MySQL, adhering to software engineering best practices.
- Improved application performance through targeted query optimization and efficient database schema design.
- Collaborated on API integrations, peer code reviews, testing, debugging, and release deployment.
- Operated within Agile delivery teams, using Git/GitHub for version control and issue tracking.

Cloud Intern (Remote)

Jan 2024 – May 2024

AWS Virtual Internship — Remote

- Gained practical, hands-on experience deploying and managing cloud-based applications using AWS EC2, S3, Lambda, and RDS.
- Provisioned and configured EC2 compute instances and RDS database instances to support application hosting and testing environments.
- Used Amazon S3 for scalable storage and Lambda for building lightweight, event-driven serverless functions.
- Supported cloud infrastructure management initiatives spanning scalability planning, uptime monitoring, and security best practices.
- Followed AWS Well-Architected principles to ensure deployments remained cost-efficient, secure, and reliable.

KEY PROJECTS

CareerNova AI — AI-Powered Career Assistant

Python • FastAPI • React.js • MySQL • Google Gemini AI • Tailwind CSS • Vercel • EmailJS

- Developed a full-stack AI-powered career platform that helps users strengthen resumes, prepare for interviews, and track job applications end to end.
- Built robust RESTful APIs using FastAPI to power resume analysis, interview preparation, and career-guidance features.
- Integrated Google Gemini AI to generate personalized career recommendations and tailored resume content suggestions based on user profiles.
- Designed the frontend with React.js and Tailwind CSS to deliver a clean, responsive user experience, backed by a MySQL database for persistent storage.
- Integrated EmailJS so users can generate and send personalized cold emails and job applications directly from the platform, and deployed the application on Vercel.

AI Code Mastery Hub

Python • HTML • CSS • MySQL • OpenAI API • Flask

- Developed an AI-powered coding preparation platform for students and job seekers, featuring automated evaluation systems.
- Built coding assessment modules with real-time feedback and performance tracking to help users identify and close skill gaps.
- Integrated the OpenAI API to generate AI-powered coding explanations and personalized learning-path recommendations.
- Designed REST APIs and a scalable MySQL database schema to manage users, assessments, and progress data reliably.
- Built interactive dashboards using HTML and CSS to visualize skill improvement and coding performance over time.

Medicine Identification for Blind People — Assistive System

Python • NumPy • Pandas • scikit-learn • Keras • Matplotlib • OpenCV • CNN

- Developed a deep learning-based medicine identification system to support visually impaired users in recognizing their medication independently.
- Built and preprocessed the image dataset using NumPy and Pandas, applying cleaning, labeling, and augmentation techniques to improve model robustness.
- Designed, trained, and evaluated a Convolutional Neural Network (CNN) using Keras, achieving approximately 92% classification accuracy.
- Used scikit-learn for train-test splitting and performance evaluation, and Matplotlib to visualize accuracy/loss curves and model results.
- Implemented real-time image processing with OpenCV and integrated voice feedback to automate medicine label recognition and enhance accessibility.

EDUCATION

B.Tech in Computer Science and Engineering

2020 – 2024

Sri Vasavi Institute of Engineering & Technology

CGPA: 8.55 / 10
